Fuel Truck repair estimate

VIII-C

We have an estimate to replace the motor in the 2001 Ford F250 truck used to haul fuel. The estimate is from Highway Tire & Diesel, LLC. We have used them with great success in the past. The estimate is \$4886.79.

The estimate includes a 30 day warranty. An additional 6 month warranty can be added for \$190.

Com. Purvis actually discussed the used motor that is proposed to be put in. The motor is the same type of motor that is to be taken out of the truck. It is a 7.3L diesel engine with 132,000 miles on it. From the calculation that Com. Purvis used the truck is 16 years old and adds approximately \$12,500 miles per year. He estimates it to be good for several years with the proposed motor.

A new Ford motor would run over \$9300.

**Chairman will need a motion: to authorize Daniel Barber to take the truck to Highway Tire & Diesel, LLC to have proposed motor installed for approximately \$4886.79 and include a 6 month warranty adding \$190.00 to the price making the total \$5076.79.**
