

# Request for Board of Commissioners' Action

From: Faye Hughes, County Administrator Date: January 12, 2018

Subject: Cecill VFD, Engine 10 Item Number: \_\_\_\_\_

I received a call today from Tony Oglesby, First In Service. Mr. Oglesby stated he has had a request from David Harris, Cecil VFD to repair Engine 10. This is the truck that was purchased when Matthew Elliott was the fire chief.

Mr. Oglesby said that he was told by Jody Meeler the transmission ran hot during the pump test. Mr. Oglesby has not looked at the truck. He said that it could cost anywhere from \$1,000 to \$6,000 to repair the truck. The highest number if the transmission has to be repaired. He said he would have to run some tests to determine the problem in order to give an accurate estimate.

Engine 10 has not been used for over a year according to Oglesby, per Jody Meeler. It has been over a year since Jody heard the fluids sound like it was boiling in the transmission.

The Board will need to make a decision whether or not have Mr. Oglesby look into this matter and give an estimate of the cost.

**Chair will need a motion to authorize Mr. Oglesby to assess the truck or not.**
