
Please see the email below. I will call you in a bit so we can discuss. In short, we can multiply the length of road in miles by \$113,670.30 for the areas that need substantial patching to get our budget number.

The above is based on the cost of the Massee Post Road Resurfacing project we completed last year. The portions of Barneyville that are in disrepair are very similar in size and amount of patching needed.

Thanks,

H. LARRY SANDERS, P.E.

Subject: RE: TSPLOST Project Information Needed

Faye,

I looked back at what Littlefield just charged us to resurface Massee Post Road. The numbers worked out to \$113,670.30 per mile for patching and resurfacing. It would be \$76,740.42 per mile without patching

There is approximately 7.85 miles that would need substantial patching.

$$7.85 * (113,670.30) = \$892,311.86$$

The remaining 3.9 miles are areas that we have resurfaced in the last 8 years or so. If we overlay these areas as well (which I do not feel is necessary at this point), there will be an additional \$299,287.64 in costs.

$$3.9 * (76,740.42) = \$299,287.64$$

I hope this helps. Call me to discuss it tomorrow if we need to.

Thanks,

H. LARRY SANDERS, P.E.

Faye,

I will look at it in a bit if that is ok.

Thanks,
