

I am respectfully requesting to be put on the next Commissioners meeting agenda to discuss the possibility of making a large purchase within Chaserville Fire Department. After several attempts to discuss the issue pertaining to our lack of Turn-Out gear, we still have not been able to purchase what we need. It is a life safety issue that we have at hand. Without this purchase, my personnel are limited to what we can and cannot do on any emergency/hazardous scene. This large purchase of personal protective equipment would put our personnel back in compliance with the National Fire Protection Association (NFPA) code 1971. I would like to address this situation with the Commissioners in the work session on the very next Commissioners meeting. Thank you.

Keith Walker, Chief
Chaserville Volunteer Fire Department
