Crisis Track™

*Your Complete Disaster Management System*

Damage Assessment Software
for Local Government

Crisis Track™ helps communities conduct damage assessments and process FEMA grant applications by integrating disaster management into typical local government workflows - clearing roads, inspecting buildings, maintaining parks, and mapping the community. The consolidation of these activities provides the emergency manager with a community-wide view of disaster management operations. Crisis Track Features include:

Structural Damage Assessment - consistently conduct structural assessments using standard damage assessment forms

Road Closures - track and publish road closures while capturing debris costs

Force Labor and Equipment Costs - easily collect labor and equipment costs and export into FEMA forms

Emergency Management Task Tracking - track typical emergency management tasks associated with a disaster

Executive View - provide your leadership with real-time updates on disaster operations

Dynamic Forms - change data collection forms on-the-fly as your information needs change

Flexible Licensing - provide unlimited access to your partner organizations
